**ROYAL GOVERNMENT OF BHUTAN**  
**PHUENTSHOLING THROMDE**  
POST CODE 21101, POST BOX NO. 02, PELKHIL LAM

Date: 10/01/2024

## Notification

Phuentsholing Thromde is pleased to inform that night collection of waste already started from November 2024 after informing the public, to resolve the inconvenience of waste disposal for office goers and other business entities. However, despite the regular services, there are incidents of dumping of waste near the roadsides and other areas after the collection vehicles are gone and such frequent incidents could be due to sheer negligence from a few individuals.

Therefore, Phuentsholing Thromde would like to request all the residents, the general public, all government & private agencies, business entities, and property owners to kindly refrain from dumping waste along the roadside and other areas and avail the waste collection services. If anyone is found dumping the waste on the roadside shall be liable for the penalty as per the **Waste Prevention and Management Act 2009 (WPMA, 2009) and its Regulation 2012 (Amendment 2016)**. Furthermore, the defaulters will be subjected to naming and shaming on social media platforms. There are CCTVs installed in various locations for monitoring.

Phuentsholing Thromde also would like to remind all the residents to strictly segregate the wastes at the household level before taking them to the collection vehicles. If the wastes are not segregated, our collection team will not accept the wastes and strict action will be taken as per the existing regulations.

*“Be a part of the solution, not a part of the pollution”*
